The Graduate Community of Digital Scholars, a joint program of the Fox Center for Humanistic Inquiry, the Emory Center for Digital Scholarship, and the Digital Publishing in the Humanities initiative, is currently accepting applications for 2023-2024. Designed for PhD students in the humanities and other humanistic fields, this year-long seminar provides structured support, connections to training opportunities, and access to funding for students developing digital and/or public-facing dissertations and research projects. The goal of the program is to offer a community in which to refine research goals, build confidence in the use of digital methods, and further develop the communication skills needed for humanistic careers within and beyond the academy.

Students meet regularly as a cohort to share works in progress and to talk through research-related uncertainties in a supportive environment. Previous meetings have focused on topics such as: refining research abstracts for grant applications and conferences; describing and justifying research methods; and oral presentations of research for public audiences. Some funding is available to students for project development, including conference attendance. For the list of previous projects supported, please visit http://fchi.emory.edu/home/programs/gcds.html.

The kickoff for the 2023–2024 cohort will take place in early September 2023. To apply, please send the following documents in a single PDF to Dr. Alexander Cors (acors@emory.edu) by June 15th:

- cover sheet with name, email, year in program, department, advisor, and title of dissertation or research project;
- brief description of dissertation or research project, including proposed digital and/or public-facing components (500 words);
- personal statement explaining your interest in joining GCDS and how you expect it to support your professional development (300 words);
- dissertation timeline with milestones (one-page outline);
- short letter from your dissertation committee advisor expressing support for your participation in the program.

Announcements will be made by the end of June.
For more information, please contact Dr. Alexander Cors (acors@emory.edu).
