

We're looking for a few good interns!

Interested in learning about professional opportunities outside of a lab?

Interested in the intersection of science, law, and business?

Then the Office of Technology Transfer's Intern programs could be for you!

Technology transfer sits at the interface of academic research with intellectual property law, business development, and marketing. Learn more about all these and prepare for the next step of your career. Gain experience in the exciting worlds of technology transfer, marketing, commercialization, intellectual property management, and licensing.

We're looking for Grad Students, Postdocs & Professional Students for the fall cohort.

Visit our website <https://www.ott.emory.edu/about/intern.html> to learn more or apply or contact Catherine Murari-Kanti at cmurari@emory.edu for information.

EMORY
UNIVERSITY

**Office of
Technology Transfer**

How do you apply?

1. Some positions require an advanced degree in science or engineering or a bachelor's degree in a life science, physical science and/or engineering. **BUT** there are opportunities for students without a strong science background.
2. If you currently work in a research lab talk to your advisor.
OTT wants to ensure that both interns and their supervisors understand the time commitment and requirements of the program (8-10 hours each week).
3. Send an application that includes a cover letter, a current resume or CV, and a writing sample to Catherine Murari-Kanti (cmurari@emory.edu).
